

Cuyahoga Falls High School

"Every Student, Every Day, Every Opportunity!"

Cuyahoga Falls High School Profile

At Cuyahoga Falls High School, we believe that student success is directly related to student involvement in activities and programs. Our extensive list of co-curricular and extracurricular activities coupled with our high percentage of student involvement keeps learning opportunities in high gear from morning to night. Last year, we could not have been prouder as our very own Cuyahoga Falls Marching Band was named the "Best Band in Northeast Ohio" through a vote sponsored by cleveland.com. This year, we are excited to launch our student owned and operated school store and consignment shop sponsored by DECA.

We work tirelessly to provide an education that is grounded in 21st Century skills and common core standards with a student-centered approach to ensure that all of our students graduate career and college ready. Our academy structure speaks to this commitment as students choose and belong to one of four interest-based small learning academies that we refer to as dens. From Arts, Media, and Design (AMD) to Human and Public Service (HPS) to Health and Wellness (HW) to Engineering and Entrepreneurship (E2), students are provided opportunities to learn through a lens and explore these through authentic learning experiences. In order to serve all of our students, we create partnerships with community organizations and businesses including which include the Veale Foundation, SGS, Western Reserve Hospital, the City of Cuyahoga Falls, and a variety of others that are willing to support our students in real-world applications.

Students at Cuyahoga Falls High School are supported academically as evidenced by the variety of course offerings that speak to the needs and interests of all of our students at all levels. Along with our numerous A.P. offerings and career technical programs where students can potentially earn college credit, we also house a number of college courses on campus that are taught by Cuyahoga Falls High School teachers acting as adjunct professors. In addition, the work of our staff in securing grants has paid off this year as we have begun a Tiger Times news broadcasting course with state of the art equipment as well as a Farm to Fresh program that will focus the entire school on the many lessons that the earth and plants provide.

Cuyahoga Falls High School staff knows that there is more to educating young adults than teaching the curriculum. As a result, each teacher takes part in a task force that meets monthly to tackle the issues that create the culture and climate of our school. We want everyone that walks in these halls to know that they are a member of the Black Tiger Family. From sponsoring a free Thanksgiving meal for all of our students to creating a thrift store for students going through rough times to the implementation of a drug-free club where students are celebrated for their positive choices, we constantly acknowledge the value of each student that goes to the Falls. Each staff member knows the importance and is driven by the district mission of "Every student, every day, every opportunity."
