

## Annual Building/Department Goals

### **Goals: Record four measure/observable goals.**

1. During the 2020-2021 school year, all Roberts students will participate in at least one age-appropriate career exploration experience each semester and complete both an oral and written assignment in order to connect academic and real-life experiences.
2. During the 2020-2021 school year, Roberts Middle School will host at least one collaborative school-business event each semester in order to connect academic and real-life experiences, as well as to expose students to a variety of diverse careers and opportunities.
3. During the 2020-2021 school year, Roberts Middle School will create quarterly opportunities to engage the community in order to create an environment which will positively impact student growth and achievement.

### **How were these goals selected?**

The BLT did a SWOT analysis on the district level goals created for the Focus Areas of the Strategic Plan. From that list, the BLT identified these three goals to focus on for our building.

### **Why are they important?**

Each one of these goals creates an opportunity for 2 things to take place:

1. **Student academic growth through real life experience**
2. **The community and the students of Roberts get to work together more consistently which will have a positive impact on all.**
